CAUSTIC & ALKALINE CLEANERS

- Breakdown organic soils (oils, grease, organic materials, proteins)
- Works best at high temperatures (120°F - 180°F)
- Low foam cleaners are used in CIP applications

ALKALINE CLEANERS

Hawkins Caustic Cleaner - High-strength, low foam, CIP caustic cleaner

Hawkins Caustic Cleaner 70PR
Mid-strength, low foam, CIP caustic cleaner (70% strength of caustic cleaner)

Hawkins CIP Powder Cleaner
Dry, non-caustic, alkaline cleaner

Chlorinated CIP Cleaner
Chlorinated, caustic CIP cleaner

FOAMING CLEANERS

- Foaming cleaners keep the product on non-horizontal surfaces for longer and enhance cleaning power
- These are used in cleaning out of place (COP) procedures. They can be used for general cleaning and soaking as well

HAWKINS PRODUCTS – FOAMING CLEANERS

Hawkins Peroxide Cleaner
High foam, 30% peroxide cleaner

Hawkins Peroxide Cleaner 9%
High foam, 9% peroxide cleaner

Hawkins Citric-Peroxide Cleaner
High foam, peroxide cleaner with citric acid and quaternary ammonium compounds

Hawkins Foaming Chlorinated Cleaner
High foam, cleaner with bleach

Hawkins Beverage Equipment Cleaner
High foam, alkaline cleaner

Hawkins Beverage Brightener
High foam, blended acid cleaner
- formulated to be gentle on soft metals

CLEANERS, EQUIPMENT BRIGHTENER, RINSE AIDS:

- Alkaline cleaners for removal of organic material
- Acid cleaners for removal of inorganic scales
- Foaming cleaners
- Low foam cleaners and more!

MULTIPLE TYPES OF EXTREMELY EFFECTIVE SANITIZERS:

- Reflex - Acid sanitizer
- GO² - Chlorine dioxide
- Bleach - Azone
- Bioside HS 15

HAWKINS PRODUCTS

SANITIZERS

- Use at temperatures below 120°F due to potential breakdown of products at higher temperatures
- Utilize test strips and test kits to ensure that the active ingredient is in the correct range

Reflex – Acid sanitizer containing peroxyacetic acid, 5.6% peracetic acid, and additional acids

GO² – Two-part chlorine dioxide kit

Bleach – Sodium hypochlorite

Bioside HS 15 – Peracetic acid 15%

Perason A – Peracetic acid 5.6%

CLEANERS

Hawkins Cleaner NPB: Low foam acid CIP cleaner nitric and phosphoric acid to remove scale and beerstone

Hawkins PC Cleaner: Low foam acid CIP cleaner phosphoric and citric acid to remove scale and beerstone – follow up to caustic cleaner

Hawkins Peroxide Cleaner: Foaming peroxide cleaner 30%. Strong oxidizing cleaner – good for tough cleaning challenges

Hawkins Peroxide Cleaner 9%: Foaming peroxide cleaner 9%. Strong oxidizing cleaner – good for tough cleaning challenges

Hawkins Citric-Peroxide Cleaner: Low foam cleaner with citric acid, peroxide, quaternary ammonium compounds – for cleaning and preparation of bottling, canning, and serving processes

Hawkins Caustic Cleaner: High-strength low foam CIP caustic cleaner

Hawkins Caustic Cleaner 70: Mid-strength low foam CIP caustic cleaner 70% of high strength

Hawkins CIP Powder Cleaner: Dry powder, alkaline, non-caustic, oxygenated cleaner

Hawkins Foaming Chlorinated Cleaner: High foaming cleaner with bleach

Hawkins Beverage Equipment Cleaner: Foaming alkaline cleaner for the exterior of equipment

Hawkins Beverage Equipment Brightener: Blended acid cleaner and metal brightener - high foam

Hawkins Rinse Aid: Clean sheeting final rinse with chelating agents to keep minerals/metals in solution

MetSafe Low Phos: Foaming alkaline cleaner for equipment like canners with soft metals

ACID CLEANERS

- Acid cleaners remove mineral deposits. They can also help to prevent future mineral deposits and help inhibit microbial growth
- They also act as a passivation step to keep the surface of stainless in its best condition

Hawkins Cleaner NPB - Low foam, CIP cleaner. Contains nitric and phosphoric acid

Hawkins PC Cleaner - Low foam, CIP cleaner. Contains phosphoric and citric acid

Hawkins Keg Cleaner - Low foam, acid cleaner. For manual or CIP use
